Dear Sir(s),

Sub: List of towns and villages supplied with electricity during the calendar year 1948 in the above mentioned Undertakings.

With your kind co-operation in the past, it has been possible for us to include a comprehensive list of towns and villages in India, supplied with electricity up to the end of 1947 in the form of an index in the publication "Public Electricity Supply, All India Statistics, 1947", which is now in the press and is expected to be out shortly.

A similar publication for the year 1948 is under preparation in this office and the names of towns and villages which have been supplied with electricity during the year 1948 will have to be incorporated in this publication. We, therefore, request you to send us a list of towns and villages which have been supplied with electricity in your area of supply during the calendar year 1948, indicating against each town or village the name of the district in which it is located.

3. As we intend to bring out the publication for 1948 well before the middle of the current year, an early reply from you will be greatly appreciated.

Thanking you for your co-operation,

Yours faithfully;

(M.B.P.Sarathy)
Project Officer.

Simla, 4, the 28-2-1950

From

The Chairman,
Central Electricity Commission

To

Manager

Sub: Electricity Statistics-Consumer Data ession:1.1.1950.

Dear Sir(s),

Please find enclosed two copies of the form C-11 for being filled in and one being returned to the Commission as early as possible before the 31st March, 1950, retaining the other for your record.

It will be noticed that the form now sent has been slightly revised as below:-

PART I

Two additional items viz., Population of area supplied and Area of Supply, are required to be shown after the name of the undertaking. The first six items in the previous form have now been regrouped under three items with two sub-divisions each.

It.....

It may again be explained here that under "Commercial Services", consumers of the nature of public places like schools, Hospitals, Cinemas, Clubs, Business premises and Government Offices etc., are required to be included. Some difficulty may be experienced in classifying combined residential and business premises but this may be done to the best of your judgement depending upon the relative importance of the two types of use in particular cases.

Item 4- Public Lighting

If it is the municipality of the place that is providing the street lighting, it should be shown as one consumer. If in addition to the municipality there are any other street lighting consumers like Panchayats, Notified Areas or private housing colonies etc., they should also be included in the number of consumers and the total number of street lights should be given separately under the remarks column but, in no case, either the number of street lights or the numbers of meters or circuits of the street lighting system should be shown in the form under public lighting consumers.

Items 8 and 9 of the previous form have now been grouped under "Traction".

Item 13 of the previous form - Military Engineering Service has now been deleted. The number of such consumers is now required to be grouped under the appropriate items of the revised form.

PART II SECTION"A"

This is exactly same as Part II of the previous form. In the case of undertakings serving a large number of consumers with maximum demands of 50 KW and above a complete list may please be given on a separate sheet.

PART II SECTION "B"

This is a new feature in the form. Small and medium industrial consumers who take power from your undertaking should be

classified.....

classified under this section giving particulars of their number, total connected load and the annual consumption. Flour Mills, Rice Hullers, Biscuit Making Factories or Bakeries, Fruit Canning Factories, Oil Expellers etc., are to be grouped under the 4th category viz., Food Industry.

We trust that you will kindly continue to extend to us your co-operation as heretofore.

Yours faithfully,

(S. Swayambu)
Project Officer

SUBJECT: ANNUAL FINANCIAL DATA IN RESPECT OF PUBLIC UTILITY ELECTRICITY UNDERTAKINGS FOR 1949.

Dear Sir(s),

It has been the endeavour of this Commission for sometime past to collect and compile financial data of the Public Electricity Supply Industry and to make such data available for statistical compilation and planning purposes. It is also their intention to ascertain the Operating Revenues & Expenses of Electricity Supply undertakings under various sub-heads.

In the case of company and local authority owned undertakings the financial data is obtained from the statutory accounts drawn up by them in the prescribed forms given under annexures to the Indian Electricity Rules, 1937. In the case of the States owned undertakings however, it has not been possible to get the requisite information in the prescribed forms. The data has to be extracted as far as possible from their Annual Administration Reports and Consolidated Accounts which are usually in the forms prescribed by the Accountants General of the States. Further, even such reports are made available only long after the close of the financial year to which they pertain.

It is considered desirable to collect the financial data on an uniform basis from all undertakings whether privately owned or state owned with a view to present a complete picture of the Electricity Supply Industry in the annual publication of this Commission. Accordingly, enclosed please find a data sheet in

duplicate .....

duplicate showing the financial details required for favour of your supplying the data. This form is in two parts - Part 'A' dealing with Fixed Capital and Current Liability and Assets and Part 'B' covering the Operating Details of the undertaking for 1949.

We are aware of the extra work involved in completing the data sheet but we hope that you would extend your co-operation and return it duly completed as early as possible but not later than 30th September, 1950. The figures you give in the statement need not necessarily be the final audited figures as it would do for the purpose of our statistical Compilation if they are extracted from the books.

Yours faithfully,

(T.N. IDNANI)

Subject:- Annual financial data in respect of public Utility Electricity Undertaking for the years 1948 and 1949.

Reference:- Your letter No. W-7117 dated 19th Sept. 1950.

I am enclosing financial data (Part "A") of the following merged power houses situated in different places for the period ending 31/12/1948.

1. Power House at Dharampur.
2. Power House at Himatnagar.
3. Power House at Santrampur.
4. Power House at Rajpipla.
5. Power House at Janjira.

These figures are unaudited and are supplied as furnished by the power houses.

The information from the following power houses has not been received and they have been expedited. Required information will be supplied as soon as the same is received.

1. Power House at Chhota Udepur

1. Power House at Chhota Udepur.
2. Power House at Mansa.
3. Power House at Vernoda.
4. Power House at Radhanpur.
5. Power House at Bansda.

The Electrical Engineer-in-charge of the power house at Baria, is not in a position to give any financial data as on 31.12.48 the power house was managed by the Ruler.

Financial data for the year ending March 1950 for all the merged Power House has been called for and will be submitted in due course. The capital accounts of the Ratnagiri and Vengurla power houses for the period ending 31/3/50 are attached herewith. These figures of capital outlay are only provision for the present and are likely to undergo changes. The work of maintaining the accounts of these power houses in forms prescribed in the Indian Electricity Rules is in hand and the accounts when drawn up in the prescribe form will be furnished to you.
